CARGO BAR

An adjustable cargo bar assembly for securing cargo within a cargo hold.

The assembly includes a rigid beam having a rod inserted through the beam.

The rod is movably adjustable respective to the beam and is provided with a surface for contacting and securing the cargo.

The assembly also provides a stop to prevent the rod from moving once the surface is positioned against the cargo.

Stops cargo shift in pickup trucks or sport utility vehicles, using the telescoping design, simply adjust the bar to fit your vehicle, then twist to tighten in place.

The cargo bar is an easy-to-use solution to hold your truck bed cargo in place.
